We're Remote Ready!

Thanks to incredible technology, we are utilizing popular tools such as Zoom and Microsoft teams to conduct our recruitment process and continue providing a much needed service to those who are seeking potential candidates or careers!

COVID-19 RESPONSE

The Talent pool

During these worrying times never is it more vital to stay engaged with our talent pool, to ensure this we;

Launched our new mobile app across iOS and android keeping candidates constantly updated on new positions (job watchdog) and up to date information on industry's changes.

Our consultants are at the forefront of their market – our consultant network is about engagement and we drive core activity to achieve this.

Our marketing team uses our CRM to consistently driving new data and information to our talent pool to keep them updated
We have moved to a model of video conference (Microsoft Teams) for all calls where possible, giving far greater engagement and a personal touch.

Keeping our contractors working and paid

TechNET has a long standing relationship with RBS commercial services for all payroll and factoring.

TechNET operate a self-bill system and pay all contractors within 7 days of invoice getting the consultants money to them faster
Covid-19 will pass in time and in consultation with our clients we are assisting with contractors moving to a fully remote model but
equally adding the value required.

We are assisting clients with transportation of necessary equipment / guidance with soft phones & system access.
