

Joe Costello

Delivery Consultant

I am an ardent .Net specialist, with a laser focus for all things C# / .Net & Microsoft. Having previously worked in sales I'm used to knuckling down and working hard to get the best I can out of any situation. I'm always ready to learn new technologies from both candidates and clients, and even if I don't know of a particular technology you can bet your bottom dollar by the end of the day I will. I strive to make my every recruitment process as cool, calm and efficient as possible for every party involved, offering top tier talent on every occasion.

WHERE WE DELIVER:

- C#, .Net, .Net Core, MVC
- Web-API, REST, SOA
- Microservices, Azure/AWS
- SQL, NoSQL, Entity Framework
- TDD, MSTest, Nunit, Xunit
- C.I/C.D, DevOps
- JavaScript, HTML, CSS
- Angular, React, TypeScript
- Xamarin

RECOMMENDATIONS:

Wealth management as it should be

Joe was very helpful and friendly with setting me up with my new employer. He's quick to respond to any questions and stayed in contact without being pushy or trying to put pressure on for making decisions.

Adam Worley
Software Developer, Netwealth

Joe worked tirelessly to help me secure my latest position. He gave me all the required information I needed to prep for the interview and continues to keep in touch. Thanks Joe!

Roger Blair
Developer, Regtransfers
